**Administration of dosage:**

*Christian does not swallow or chew tablets or capsules.*

1. We use a medicine-dispensing cup for mixing and administering the dosage.
2. Crush the Lamictal tablet(s) using a pill crusher. Empty the powder into the medicine cup.
3. Open the Neurontin capsule(s) and shake/empty it into the medicine cup. Make sure the capsule is empty.
4. Using the medicine dropper get the appropriate dosage of Valproic Acid and mix it with the other meds in the medicine cup.
5. Add 3-4 ml of water, mix using the medicine dropper. Make certain that ALL the powder is mixed into the liquid from the cracks/seals in the bottom of the medicine cup. Once thoroughly mixed administer WITH THE DROPPER.
